Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest a method of determining whether a compound modulates insulin receptor activity by comparing all or part of the structure of the compound to all or part of the fitted quaternary structure of an insulin receptor using the structural coordinates recited in claims 3, 9, 11, and 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
